

How much money can you save by using radios? The answer to that question depends on many factors, but we will try to address a couple of them here.

It is estimated that 1/2 hour, on average, can be saved by using two-way radios for an 8 hour shift in a manufacturing environment. Most other industries are similar in time savings. Depending on the industry and environment you are in, you may save more, much more by using your radios more.

If an employee saves 1/2 hour per day and earns \$10.00 per hour, the savings are \$5.00 per day - for 22 working days per month the savings are \$110.00 - for 12 months the savings are \$1,320.00 *per person at this wage that is using a radio per year!*

Table of savings for hourly wages at 1/2 hour saved.

Hourly Rate	Daily Savings	Monthly Savings	Yearly Savings
7.50	3.75	82.50	990.00
10.00	5.00	110.00	1,320.00
12.50	6.25	137.50	1,650.00
15.00	7.50	165.00	1,980.00
17.50	8.75	192.50	2,310.00
20.00	10.00	220.00	2,640.00
22.50	11.25	247.50	2,970.00
25.00	12.50	275.00	3,300.00
